## Aspiring Full-Stack Developer

Aspiring Full-Stack Developer with hands-on experience in React, Node.js, and modern web technologies. Built and deployed end-to-end applications including reservation and appointment platforms. Passionate about clean code and real-world problem solving.

---

### KEY

### COMPETENCIES:

**Frontend Development:** HTML5, CSS3, JavaScript (ES6+), React.js, Next.js, Responsive Web Design, UI/UX Principles.

**Backend & APIs:** Node.js, Express.js, Hasura, GraphQL, REST APIs

**Databases & Cloud:** MongoDB, Firebase (Firestore, Auth, Hosting), SQL(MySQL/XAMPP)

**Automation & Tools:** n8n (workflow automation), Git & GitHub (Version Control), Deployment

**Other Skills:** Java (Intermediate), Strong problem-solving & communication, Proactive and self-motivated

---

### INTERNSHIP EXPERIENCE

#### Technical Analyst Intern – Requin Solutions

Aug 2025 – Dec 2025

- Working on Machine Learning workflows using KNIME for data preprocessing, model training, and predictive analysis.
- Performing data visualization and reporting using Power BI to derive actionable business insights.
- Leveraging Excel-based analytics for exploratory data analysis (EDA) and performance tracking.
- Collaborating with cross-functional teams to automate data-driven decision-making processes.

#### Web Design Intern – Dectify.in

February 2025 – April 2025

- Collaborated with UI/UX teams to create responsive web pages.
- Assisted in the design and implementation of client-facing interfaces.
- Improved visual design skills and deepened understanding of layout principles and user interaction.

## PROJECTS

### 1: UI CLONES:

I have created UI clones of popular websites like Netflix and Amazon, replicating their design to demonstrate my CSS expertise.

### 2 : Travel Planner (HTML,CSS,JS,SQL,XAMPP):

Nomad Speaks is a travel itinerary/planning website that assists users in pre-planning their vacations. Additionally, I integrated a contact/enquiry form to collect user-submitted information.

### 3: DineReserve Hotel (Table reservation system):

I developed a hotel table reservation system with various features, including table reservations, food ordering for pickup, party hall reservations, a cost calculator, and a search engine for menu items.

### 4: Medi-Dash:

Medi-Dash is an appointment booking platform for healthcare providers. It offers features like easy scheduling, automated reminders, patient management, online booking, real-time availability, and secure data handling, ensuring efficient and seamless patient-clinic interactions.

### 5: PeakPursuit(under development):

I'm currently developing a sophisticated project designed to enhance the camping experience. This platform gathers user data to analyze and recommend ideal camping locations specifically in mountainous areas and various states of India. It incorporates advanced features to assess user preferences and conditions, ensuring tailored and optimal camping suggestions.

### 6: Shopify App (Firebase Authentication, CRUD, Deployment):

I developed a Shopify-inspired web application where I implemented login/signup functionality using Firebase (BaaS) for the first time. The app includes CRUD operations such as adding items to the cart and removing them, with persistent cart data storage even after logout. The project is fully deployed and accessible via a live link, showcasing end-to-end functionality from authentication to deployment.

## EDUCATION & CERTIFICATIONS

### Bachelors of Technology (Currently Pursuing)

Majors: Information Technology  
Minor: Web Development  
Manipal University Jaipur  
(Passing Year: 2026)

## EXTRACURRICULAR ACTIVITIES

### Organizing committee, DC

Manipal University Jaipur

### Blood Donation Camp

Volunteer organizing team member
