WEB DEVELOPER & FRONT-END DESIGNER

Aspiring full-stack web developer with a strong foundation in HTML, CSS, JavaScript, and Java, with hands-on experience building responsive, user-friendly projects. Recently interned as a Web Designer, gaining real-world experience in UI/UX and collaborative design. Currently expanding skills in React and backend technologies like Node.js. Experienced in developing systems like table reservations and clinic appointment platforms. Passionate about clean, efficient code and eager to contribute to a development team.

KEY COMPETENCIES

Responsive Web Design	Version Control (Git) UI/UX	Strong interpersonal skills
HTML/CSS Proficiency	Design Principles	Proactive and self-motivated
JavaScript Expertise	Java proficiency	Excellent communication skills

PROJECTS

1: UI CLONES:

I have created UI clones of popular websites like Netflix and Amazon, replicating their design to demonstrate my CSS expertise.

2 : Travel Planner (HTML,CSS,JS,SQL,XAMPP):
Nomad Speaks is a travel itinerary/planning website that assists users in pre-planning their vacations. Additionally, I integrated a contact/enquiry form to collect user-submitted information.

3: DineReserve Hotel (Table reservation system):

I developed a hotel table reservation system with various features, including table reservations, food ordering for pickup, party hall reservations, a cost calculator, and a search engine for menu items.

4: Medi-Dash:

Medi-Dash is an appointment booking platform for healthcare providers. It offers features like easy scheduling, automated reminders, patient management, online booking, real-time availability, and secure data handling, ensuring efficient and seamless patient-clinic interactions.

5: PeakPursuit(under development):

I'm currently developing a sophisticated project designed to enhance the camping experience. This platform gathers user data to analyze and recommend ideal camping locations specifically in mountainous areas and various states of India. It incorporates advanced features to assess user preferences and conditions, ensuring tailored and optimal camping suggestions.

INTERNSHIP EXPERIENCE

Web Design Intern – Dectify.in

February 2025 – April 2025

Collaborated with UI/UX teams to create responsive web pages.
Assisted in the design and implementation of client-facing interfaces.
Improved visual design skills and deepened understanding of layout principles and user interaction.
